Querri
What would you like to do?

The Data Problem

You have a **business** to run.

You have **data** and spreadsheets.

But getting to the **answers** you need –**at the speed of business**–is a **messy**, scattered challenge.

Holding you back.

It’s Not Easy to Solve

Why…?

- The average time to build a BI system is **3-4 months**, or **2000+ Hours**.
- **70%** of data teams report spending more time on **pipeline maintenance** than on deriving insights.
- Organizations leave **97%** of gathered data unused.

- Chris Clark, CTO

Querri Solves a Universal Challenge

Goal

Flexible Visibility Into Your Business

So you can...

- Explore for Ad Hoc Answers and Insights
- Watch Trends and optimize business factors over time

Blockers

Underlying Messy And Scattered Data

...Which can be like feeling your way through a dark warehouse.

The Querri Key

Explore
Automate
Clean & Join Data

= Business Visibility

All by talking to your data. Let us show you how!

Explore for Ad Hoc Insights

at the Speed of Business

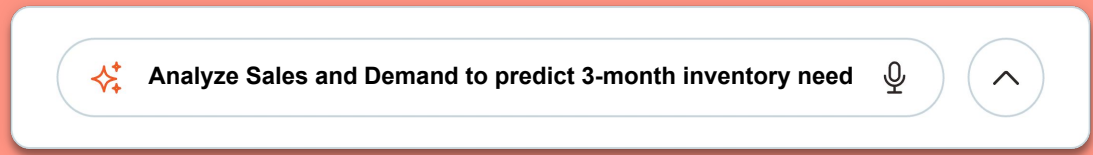
Typical Current State

- We have a lot of data we don't even think to tap.
- Data tools are not easy to use, so we rely on static dashboards or spreadsheets
- When moving fast, gut feel often prevails.

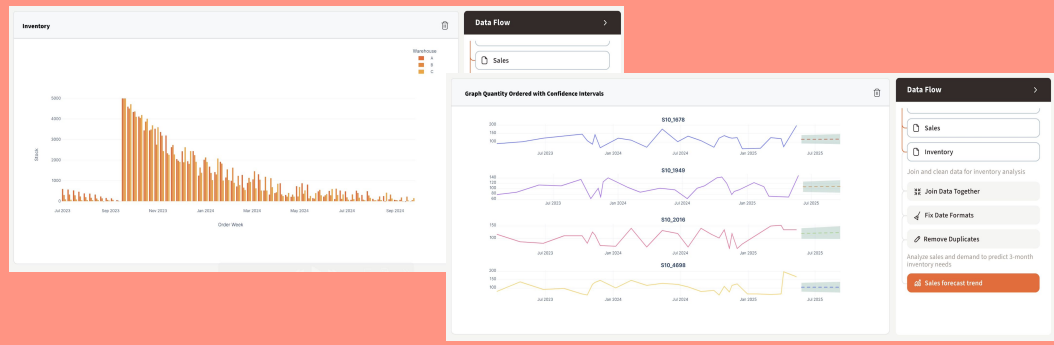
Querri it

1. Load data from any system of record or spreadsheet

2. Ask Querri!



3. Querri works out the details and answers in minutes.



Automate for Evergreen Dashboards

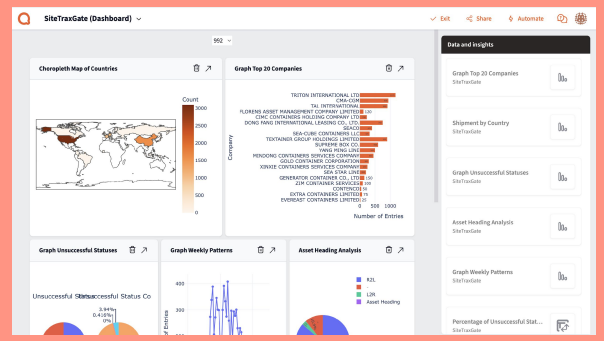
ready for that weekly business review!

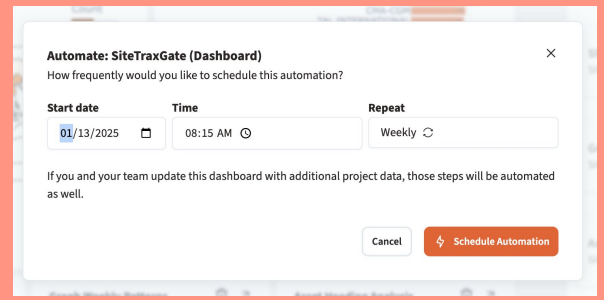
Typical Current State

- We spend too many hours preparing spreadsheets and reports every week.
- A data tool exists but the people with questions aren't the experts at building the dashboards we need.
- Data analysts are backlogged.

Querri it

1. Ask all the questions you have of your data
2. Add to dashboard and drag-and-drop as you see fit
3. Click "Automate" and Querri will re-run the whole thing from your new data





The Querri Difference

Typical Current State

- Messy and incomplete data limits insight and actionability
- Siloed data hinders cross-team alignment
- Too much time fixing data rather than running with insights

Querri

- A single tool for integrating, cleaning, joining, exploring and automating your data, without a line of code.
- Business and Operations leaders get answers right away, so they can focus on delivering value.
- Gain continuous visibility into your ever-changing business, market and world.

DEMO

Scale Your Business Success

Get out of your data wrangling side job and get into your work with Querri.

The business visibility you need with the ease you want.

- Zero learning curve: talk to your data
- In-the-moment usability supports business curiosity
- Automated dashboards keep you in the know
- Responsible AI turns data mess to opportunity
- Data-backed decisions at the speed of business!

Why You Can Trust Querri

Your data is yours:

- **We don't** use it to train our models or monetize our business
- It's **isolated** from other customers' data

You control visibility:

- Decide who gets data **access** as a viewer, editor or owner
- Adjust access controls **at specific steps** in your data pipeline

Results are transparent and repeatable:

- Querri shows and **explains** what it did
- Results are based on **repeatable** code, increasing accuracy

Your Success is our Priority

Querri prioritizes customer success with our 3-step plan:

We begin by understanding your needs and goals.

Then we partner with you to develop a customized success plan.

Finally, we provide ongoing support – at no additional cost - to help you achieve your objectives.

Get Started with Querri Foundation

Everything you need to get started right out of the box

Connect with popular file storage systems: Ingest spreadsheet data from Dropbox, One Drive, Box, GDrive, etc., with just a few clicks.

Explore, Join, Clean, Transform in Minutes: Explore data, clean for missing values, duplicates or inconsistent formats using simple instructions.

Visualize Data For Deep Insights: Create interactive charts, graphs, pivots, and plots with a few words, or ask Querri to suggest appropriate charts.

Add-on: Querri Dashboards

Gain insights with powerful, customizable, interactive dashboards

Build interactive dashboards with drag-and-drop dashboard builder for executive decision making.

Share dashboards with team members for collaboration.

Add-on: Querri Integrate

Ingest data from disparate sources with seamless integrations

Ingest data from various data sources such as ERP, CRM, Warehouse and other management systems.

Quickly and easily build custom integrations into other tools.

Add-on: Querri Enrich

Enrich your data w/ additional context & accurate info

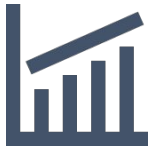
Update incomplete, outdated, or inaccurate information with complete, accurate, and relevant publicly-available information through real-time online search. E.g stock price, weather info, traffic info, etc.

Visualize data points on interactive maps or perform proximity analysis using Querri's Geospatial capabilities.

Perform advanced cleaning tasks such as standardization, normalization, handle missing data, etc.

Add-on: Querri Decide

Unlock smarter decisions with predictive and forecast modeling



Predict future outcomes and anticipate risks with sophisticated predictive modeling for short-term planning.

Perform sophisticated analysis to forecast demand, patterns, and trends for long-term planning.

Perform advanced scheduling and optimized route planning with the Scheduler tool.
